

The Empower Personalized Experience

With the personalized experience, you can see your complete financial picture in a whole new way – in one place with a single login. You will see a clear view of your retirement plan balance, all your other accounts and suggested potential changes that could improve your financial outlook. These features are available across mobile, tablet and desktop.

Linking accounts

Linking accounts is the process of adding other accounts – like checking, savings, credit cards, health savings accounts, 529 college savings, brokerage and stock accounts – to your Empower profile. Linking accounts takes just moments and gives you a fuller picture of your finances in one place.

Easily and securely link accounts from over 16,000 financial institutions at any time. Beyond financial institutions, you can add other accounts for a total picture, e.g., home values via Zillow, mortgages and collectibles.

Net worth

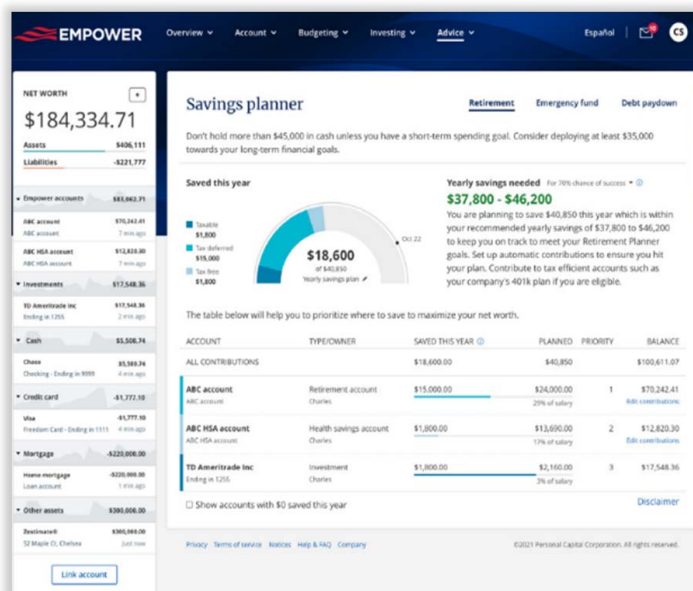

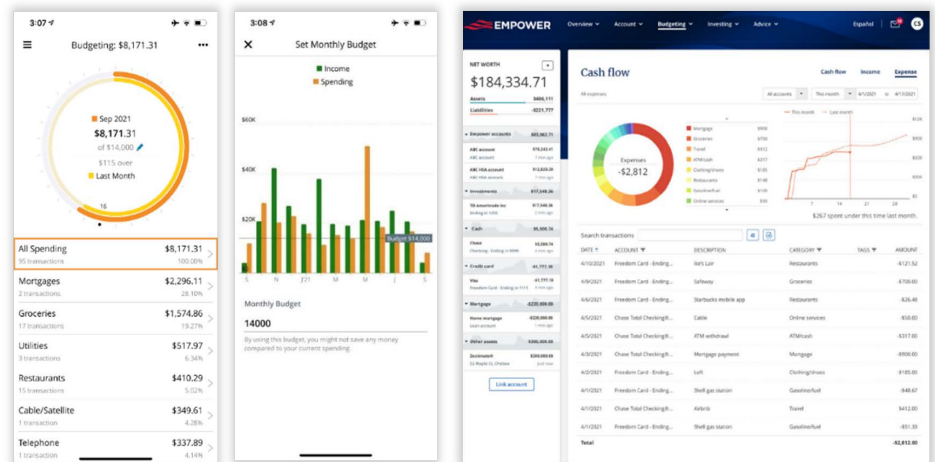

Linking accounts provides a view into your net worth and the net worth of your household. Instead of a single view into your retirement savings, you now have access to a full financial picture.

Your net worth is a good measure of where you stand at a point in time. The more accounts you link, the clearer view you'll have of what you own (your assets) and what you owe (your liabilities).

Budgeting and Cash flow

As you share more, we can help more – well beyond traditional retirement plans. For example, if you link a checking account or credit card, the budgeting and cash flow tools help you make and keep a budget.

The cash flow tool shows the inflow and outflow for all linked accounts and includes spending trends by category, month-to-month comparisons and budgets that can be adjusted.

Retirement and Savings Planners

The Savings Planner helps you see how much you are saving and how that compares to your goals – going beyond the retirement plan to help you pay down debt and plan for a rainy day with the emergency fund.

The Retirement Planner runs 5,000 simulations to deliver custom household retirement projections. This incorporates expected return and volatility, annual savings, income, spending goals, retirement spending, Social Security and tax rules for taxable, tax-deferred and tax-free accounts.
